

Energize your career in the growing CANDU nuclear power industry.

Atomic Energy of Canada Limited [AECL] the designer of CANDU nuclear power plants, is an integrated technology company providing services to nuclear utilities worldwide. Our 4,800 highly skilled employees deliver a range of nuclear services including: R&D support, construction management, engineering, waste management and decommissioning in support of CANDU reactors and related products.

AECL staff support operating CANDU plants and work on CANDU “New Build” and reactor refurbishment projects around the world.

AECL has immediate openings at its office in Saint John, New Brunswick. These openings are for **experienced engineers and scientists, technologists, and support staff** at intermediate to senior levels in the following areas/positions:

- Project Engineering/Management
- Electrical and Instrumentation Engineers and Technologists
- Mechanical Engineers
- Civil Technician Engineer/Technologist
- Welding Engineers
- Technologists and Technicians
- Technical Training
- Technical Supervisors
- Quality Control/Assurance
- Planners and Document Control
- Purchasing
- Radiation Protection and Health Physicist
- Safety & Licensing
- Administration

CANDU experience is an asset, especially site experience and knowledge of associated engineering change control processes and documentation systems. Applicants with experience in other related sectors of industry will also be considered.

Visit our website at www.aecl.ca/positive for information on AECL and submit your application by visiting our office at 430 Bayside Drive from 8:30 a.m. to 4:30 p.m. or by email quoting #110507 to doironv@aecl.ca.

In support of our Employment Equity Program, we encourage applications from women, aboriginal people, visible minorities, and persons with disabilities.

Positive **Energy**: You've got it. So do we.
